Exhaust Upgrades

Popular exhaust upgrades for the C7 S6/S7 include valved cat-backs, resonator deletes, high-flow downpipes, and full systems from brands like Akrapovič, AWE, and Milltek to improve sound, reduce weight, and increase performance.

- TGK Motorsport Driveshaft Tunnel Brace

TGK Motorsport Driveshaft Tunnel Brace

The TGK Motorsport Driveshaft Tunnel Brace is designed to provide enhanced clearance for aftermarket exhaust systems, replacing the shallow-fitting OEM tunnel brace. This upgrade enables the installation of larger diameter exhausts without inducing excessive rattling or vibration the larger exhausts coming in contact with the OEM brace.

Features:

- Enhanced Stiffness Compared to Factory OE Stamped Steel Part
- Bent From 5MM Plate Aluminum
- Black Anodizing for Corrosion Resistance
- Offers an Additional 18mm of Exhaust Clearance Compared to OE Part, Facilitating Installation of Larger Diameter (Up To 1” Diameter Larger) Aftermarket Exhausts
- Quick and Effortless Installation Process
- No Increase in Noise, Vibration, or Harshness (NVH) Levels
